Simple concept, lots of fun. After going through about a dozen levels, it definitely increases in difficulty over time. Relatively simple enough to make it to the hole, but getting it done within enough time to get 3 stars ranges from difficult to outright tricky. The bouncing mushrooms provide a good deal of zany frustration to the levels (in a good way). Nice sound effects, charming music. overall a very good game for casual players who may not care about getting every single star for every single level, while still a good challenge for those who do want to get all those stars. I do wish there was a way to restart the level, rather than being forced to move on to the next one. - This was fixed by the developer the day after I posted my review.. lovely little game if you want to play something. maybe you could add an arrow that points at your ball at the start of the level.
